Sir:

AMENDMENT

In response to the Office Action dated January 16, 2002 in the above-entitled patent application, kindly enter the following amendment:

Please amend claim 1 to read as follows:

A1 Sub B1

1. (Amended) A construction material comprising (a) a cellular expanded sheet of material formed by longitudinally stretching a sheet of flexible material having discontinuous slits in spaced apart lines parallel to each other but transverse to the longitudinal dimension of said sheet, and (b) a filler material comprising aggregate and tar filled in the cells of said cellular expanded sheet.

COPY OF PAPERS
ORIGINALLY FILED

Please amend claim 6 to read as follows:

A2 Sub B2

6. (Amended) A method of producing a construction material comprising the steps of slitting a sheet of flexible material to provide discontinuous slits in spaced apart lines parallel to each other but transverse to the longitudinal dimension of said sheet, stretching said slitted sheet to produce a three-deminsional cellular configuration, filling the cells thereof with a mixture of

A29 Sub B2
Control

melted tar and aggregate, and subsequently cooling said material to produce a hardened layer of construction material.

A29 Sub B3
Control

Please amend claim 11 to read as follows:

11. (Amended) A method of providing a construction material comprising the steps of producing a compact roll of a continuous sheet of unexpanded flexible material having discontinuous slits in spaced apart lines parallel to each other but transverse to the longitudinal dimension of said sheet; transporting said roll in compact, unexpanded form to a site of usage; unrolling and stretching said continuous sheet to provide a three-dimensional cellular material; and filling the cells of said cellular material with a mixture of melted tar and aggregate.

Attached hereto is a marked-up version of the changes made to claims 1, 6 and 11 by the current amendment. The attached page is captioned "**Version with Markings to Show Changes Made.**"

A29 Sub B4

Please add the following new claim:

12. A construction material comprising (a) a cellular expanded sheet of material formed by longitudinally stretching a sheet of flexible material having discontinuous slits in spaced apart lines parallel to each other but transverse to the longitudinal dimension of said sheet, the longitudinal edges of said sheet being intercepted by slits on said slit lines, and (b) a filler material comprising aggregate and tar filled in the cells of said cellular expanded sheet.

REMARKS

Reconsideration of the application as amended is respectfully requested.

Referring to Section 1 of the Office Action, copies of the references requested by the Examiner are enclosed herewith.
